

Focal

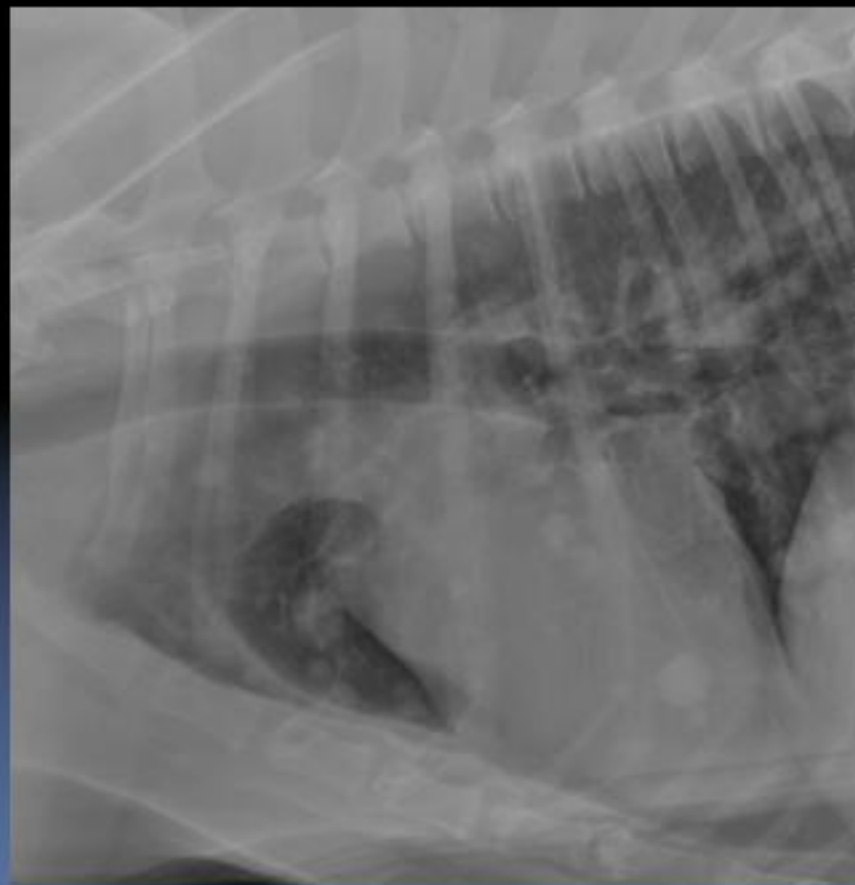

Multifocal

Multifocal (Nodules)

- Differential Diagnoses
 - Metastatic Neoplasia
 - Granulomas
 - Cysts
 - Abscesses
 - Hematomas

Generalized Mets

Fungal

Atypical Pneumonia

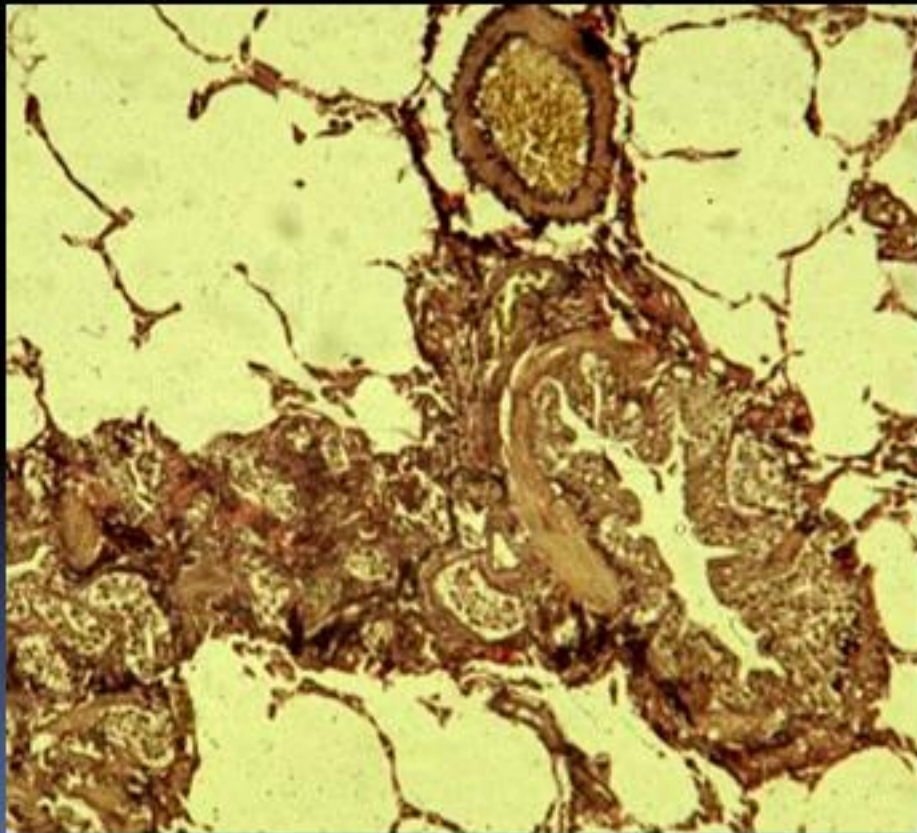

Bronchial

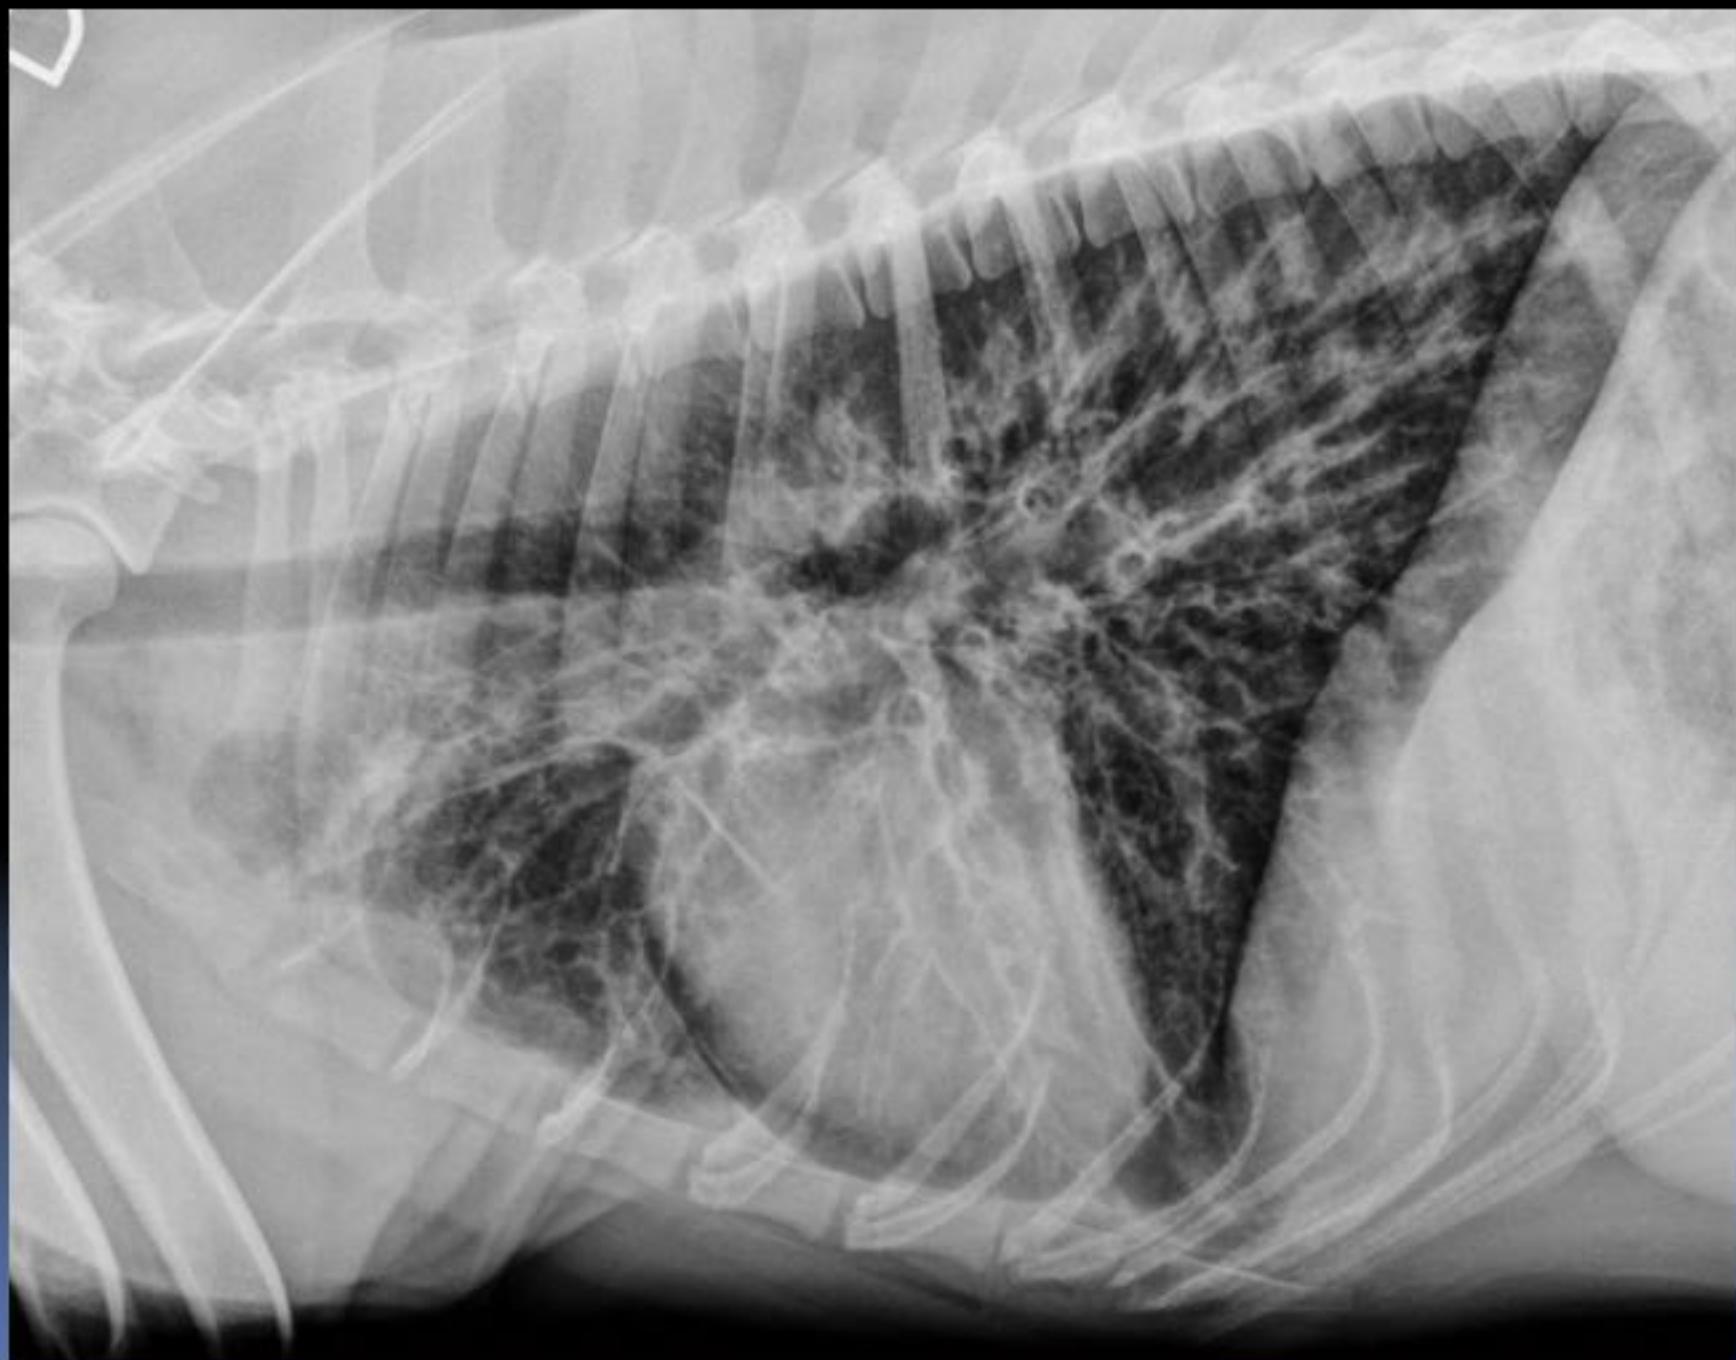

- Increased markings of **bronchi**, not bronchioles
- Donuts and Railroad Tracks
- Bagels and Tramlines
- Thickened, fluffy walls
- Dilated Bronchi = bronchiectasis
 - Chronic inflammation/Pneumonia

Bronchial

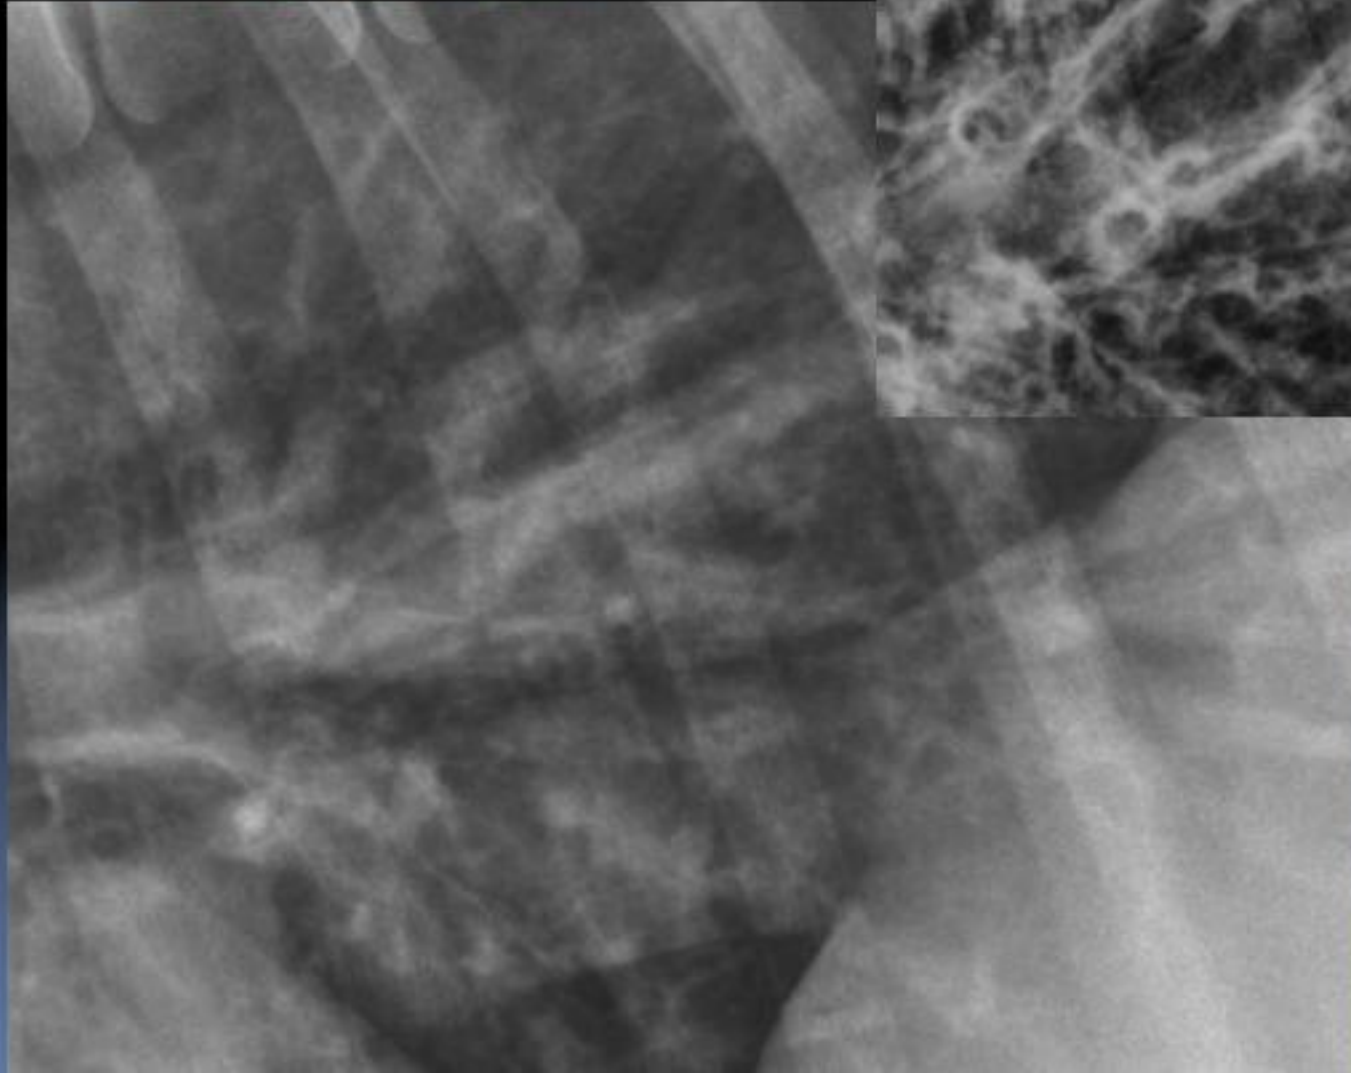

- dDx
 - Feline Asthma
 - Bronchitis
 - Parasites
 - Pulmonary Infiltrates with Eosinophilia (bronchopneumopathy)
 - Allergies

Bronchial

Normal v
Bronchial

Bronchi

m EDK® Digital Radiography System

Feline Asthma

Feline Asthma

- Bronchial Pattern
- Hyperinflation
 - Flattened diaphragm
 - Caudal excursion of diaphragm
 - Tenting of diaphragm on VD

Bronchial Pattern Parasites

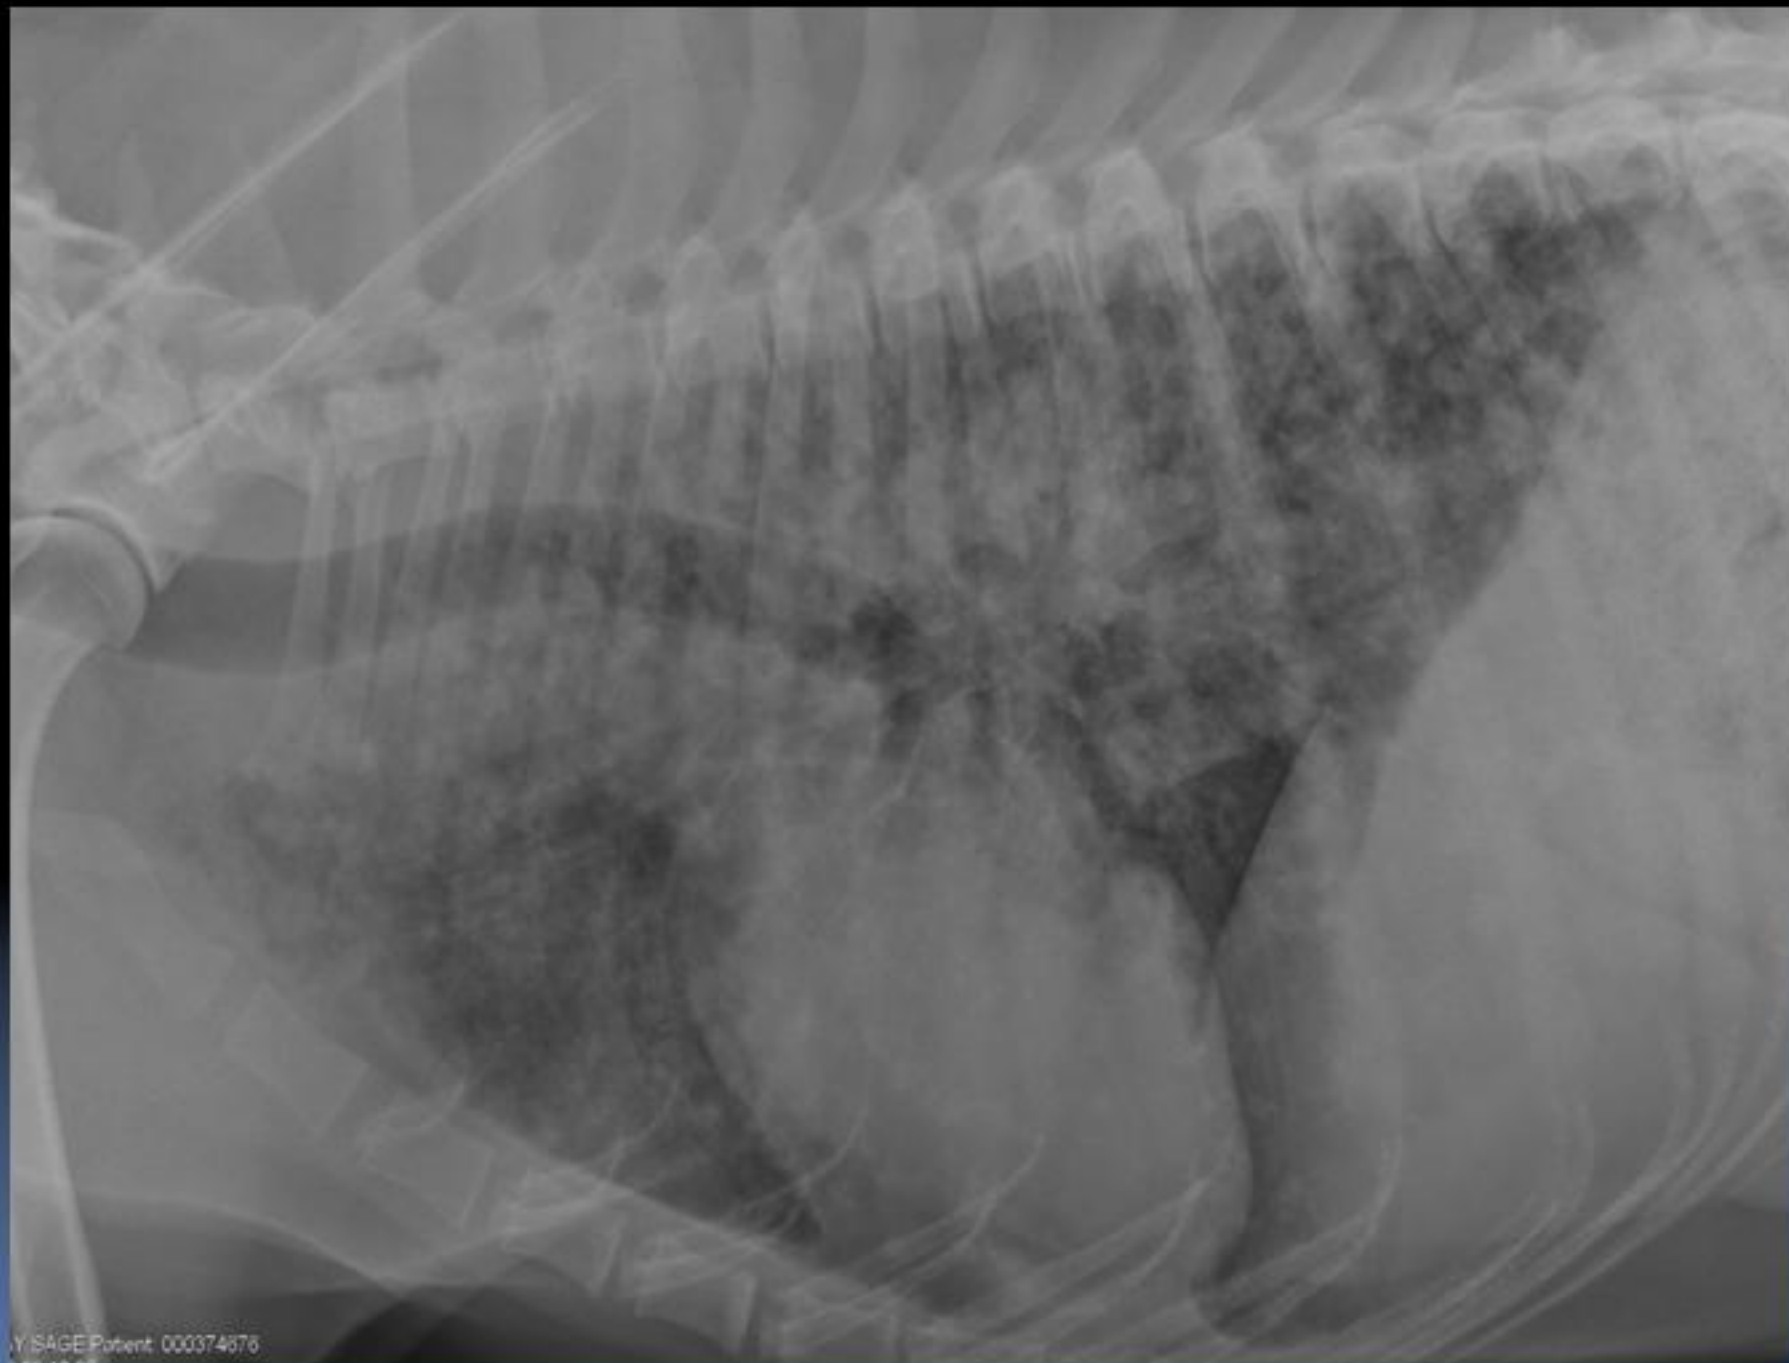

Bronchial Paragonamus

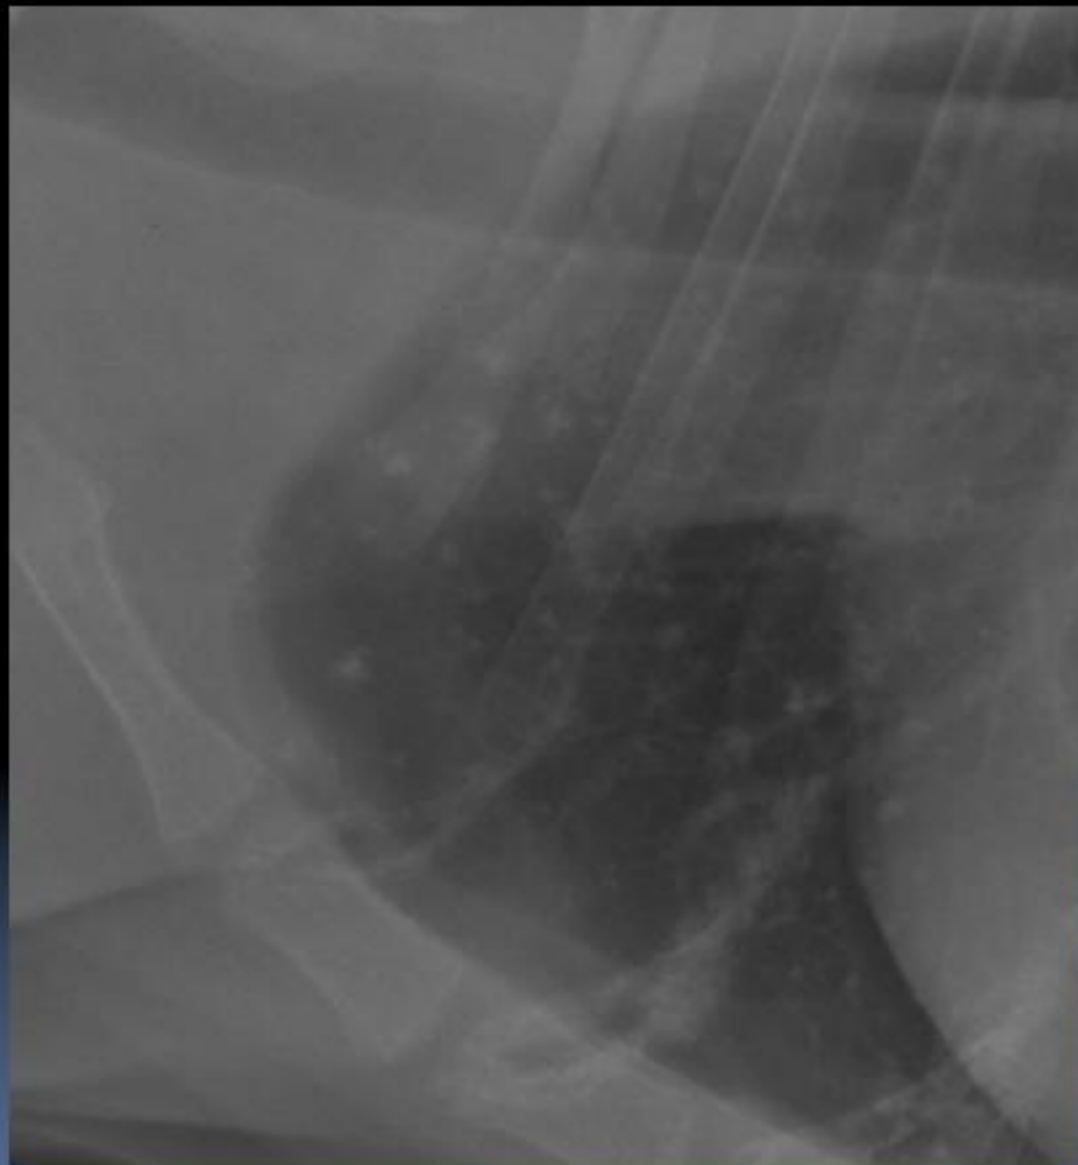

Nodular

- < 3-4 cm in diameter
- Soft tissue opaque
- Distinguish from end on pulmonary vessels and osteomas

Osteomas

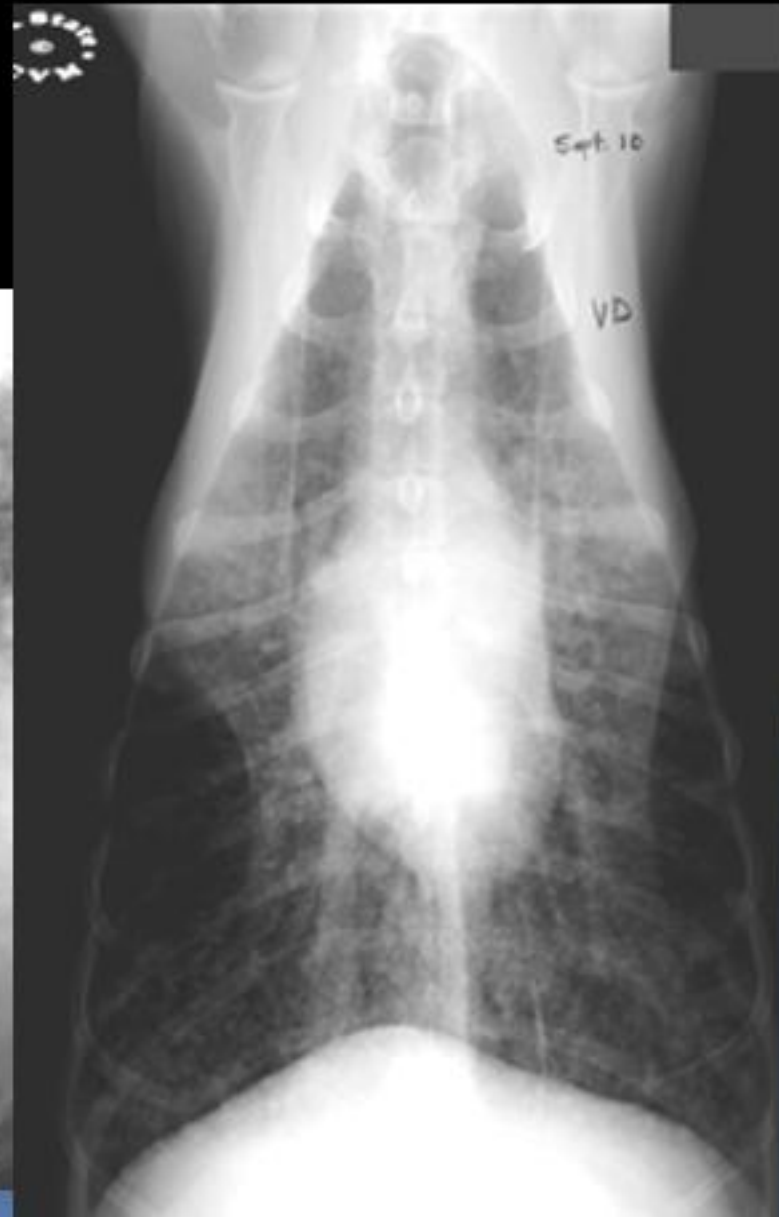

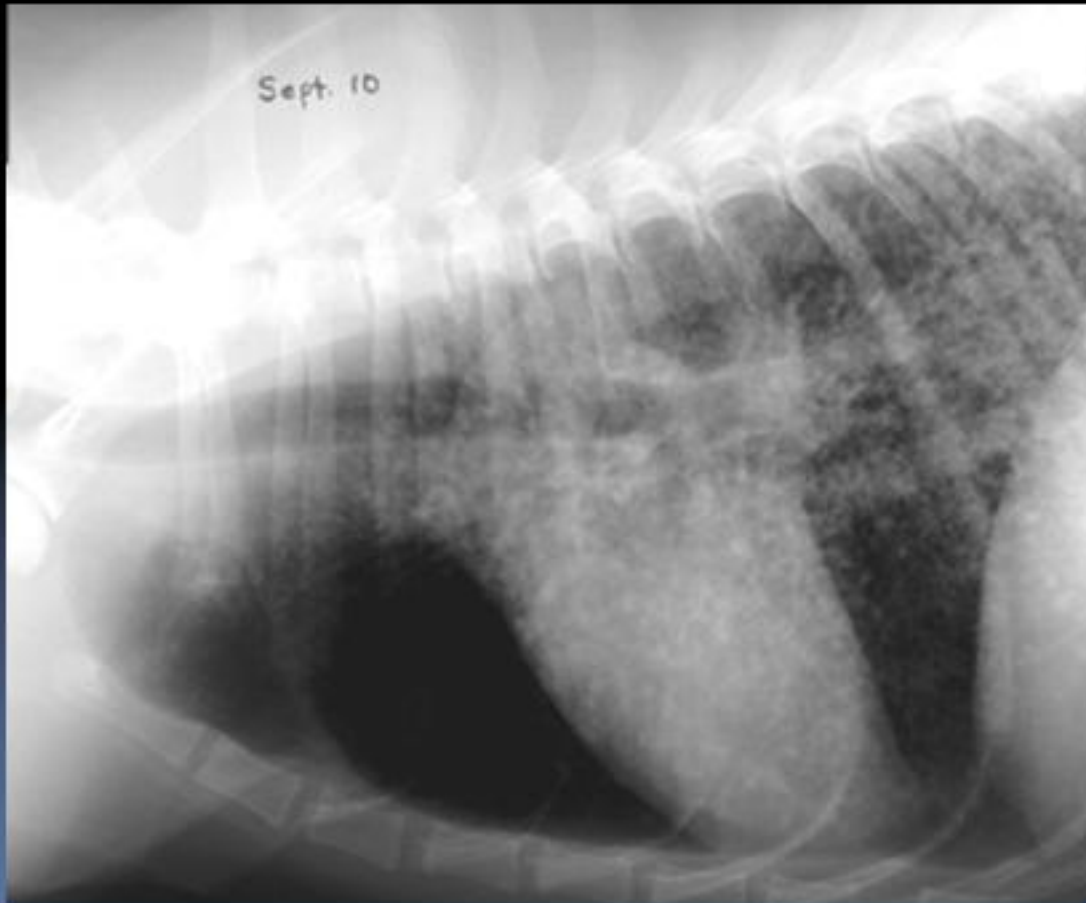

- Metastatic Neoplasia
- Fungal
- Atypical

Many Faces Of Fungal Pneumonia: Abscesses

Fungal: Nodules

Fungal Consolidated Lung

Fungal: Interstitial
